Art Unit: 1644

1. Claims 9-22 are pending.
2. Upon reconsideration, the species election set forth in the last Office action has been removed.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Duro et al. (ad on the IDS submitted 7-1-02).

Duro et al., teaches contacting serum with recombinant Par j 2 to detect pollen allergy. Duro et al., further teaches that the characterization of the recombinant antigen is a preliminary step for use of said protein therapeutically. The prior art teaches all of the method steps of the claimed invention and as such anticipates the claimed invention. The preamble adds no additional limitations to the claims since the same product was used in the same method steps for identifying allergens from patients.

The prior art teachings anticipate the claimed invention.
